

NASAL OIL BABY
Oil for skin around nose

Code: 1602

When an adult gets a cold, dealing with it is mostly simple. But what to do if the same problems come up in a child? It is hard to tell in this case. A child's nose is much more sensitive and irritation-prone, and that's why preparations for children should receive special attention. NASAL OIL BABY is an excellent preparation free from any synthetic substances or mineral oils that may cause health issues in children. The preparation's basis consists of the finest almond oil and St. John's wort extract. Chamomile and lavender essential oils are other active ingredients whose excellent properties surely don't need to be called to mind too much. So NASAL OIL BABY doesn't contain any menthol, which, although very effective, may produce brief discomfort on reaching a damaged mucous membrane. The implementation of chamomile and lavender endows the preparation with a sweet smell, pleasant to every child.

NASAL OIL BABY forms a thin oily film on the nasal lining, protecting it from drying out as well as from harmful environmental effects. The selected essential oils are known for their antimicrobial effects and may as a result prevent pathogens from remaining and multiplying in the nasal cavity. So the oil can be used not just for getting rid of the symptoms of a cold, but also as part of regular skin care of the nasal area. Upon agreement with Mr. Hadek, NASAL OIL BABY has been tested in the Institute of Pediatrics, Obstetrics and Gynecology of NAMS of Ukraine on a large number of newborns at a high perinatal risk of infection. The results clearly show a favorable influence of this oil on the nasal mucosa – they confirmed its higher resistance and a restoration of the natural nasal microflora.

Main ingredients: Vegetable oils: almond, soybean, jojoba, St. John's wort extract. Essential oils: chamomile blue, lavender. Vitamins A, E, F.

Application: For older children, we suggest an application on the skin of the nasal area and the nostrils several times a day. For younger children, who may find this way of application a bit hard on them, it will be just fine to rub the preparation into and around each nostril with a piece of cotton several times a day.

INCI: Prunus amygdalus Dulcis Oil, Glycine soja Oil, Simmondsia chinensis Seed Oil, Triticum vulgare Germ Oil, Hypericum perforatum Flower Extract, Tocopheryl acetate, Retinyl palmitate, Lecithin, Chamomilla recutita Flower Oil, Lavandula angustifolia Oil

Storage: The stated expiry date can be substantially extended by keeping the product in a dark and cold place (ideally in a fridge at 6–10°C).

Best before the date indicated on the packaging. Batch number and volume are indicated on the packaging.
