

Code: 2001

The MONTANA cream, as the name itself suggests already, makes use of the active ingredients present in arnica. Arnica montana is familiar for its ability to stimulate blood circulation in the skin, which may in turn improve lymphatic circulation in the place of application. This way it helps skin detoxification and cell regeneration.

Thank to arnica, this preparation may promote minor injury healing and help in reducing swelling. It soothes the skin, contributes to improving skin regeneration and restores its natural functions. The skin becomes soft and supple after application. Also suitable for treating minor surface injuries. It can be described as a special preparation for combination skin.

The preparation has also proved very effective when treating dry elbows. But it can also be used with success in foot care.

Main ingredients: Vegetable oils: sesame, walnut, wheat germ, etc. Arnica macerate. Lecithin. Beeswax. Emulsifiers. Essential oils: juniper berry, rosemary. Vitamins A, E, F. Beta-carotene, panthenol. Allantoin. Glycerin. Distilled water.

Application: Wash your face and apply the required amount of the regenerative cream on the skin, working in gently. The skin is not shiny after application.
